I tried to download the trainer and bot for AQW but i cant. Feb 24, 2020 Originally published June 9, 2016. I was able to get this trainer working, and the bot working for the most part, on both the 3.4.9.0 build of the game and the 3.5.2.2 build. Apr 10, 2020 I have also tested out this trainer on the APQ version of the game, and while there are some minor differences, the trainer still works just fine.Q: Proving the transitivity of a mapping Let \mathcal{P} be a collection of subsets of a set X that is closed under arbitrary unions, finite intersections and arbitrary complements. Let f be a mapping from X to X , and suppose that f is transitive. Define f on \mathcal{P} by: $A \in \mathcal{P} \rightarrow f(A) \in \mathcal{P}$. Prove that f is a transitive relation. A: Let $A, B \in \mathcal{P}$ such that $A \subseteq f(B)$ and $f(A) \subseteq f(f(B))$. We have to prove that $f(A) \subseteq f(B)$. Since $f(A)$ is an element of \mathcal{P} and f is transitive, there is $C \in \mathcal{P}$ such that $f(A) = f(C)$. We want to prove that $f(A) \subseteq f(B)$, that is, $f(A) \subseteq f(B)$. Since $f(A)$ is an element of \mathcal{P} and $f(B)$ is an element of \mathcal{P} , there are S and T such that $S \subseteq A$ and $T \subseteq f(B)$. But $S \subseteq f(B)$, so $f(S) \subseteq f(B)$. Also $T \subseteq f(B)$, so $f(T) \subseteq f(f(B))$. Finally, $f(S) \subseteq f(A)$, so $f(A) \subseteq f(B)$.
