KiCAD is a free, open source C++ software design tool that provides an integrated development environment for architecture, mechanical, electronic, and software design. It is designed to provide tools to enable users to create electronic circuits, both schematics and HDL code, and to generate C and Assembler source code from schematic designs. The schematic editor is the most powerful and the most feature-rich available for CAD software, with AutoCAD being only one of many. KiCAD provides tools for designing and verifying the schematics and software, and testing the physical design in simulation. KiCAD is released under the GNU GPLv2 license and the source code is available from the KiCAD project web site. The following list is of free CAD and CAM software packages that have been featured in the Tabletop Magazine in our Open Source Edition feature category. I am looking to write a script that reads a CSV file, counts the number of times that data is in the file, and then stores it in an array. My CSV looks like this: "17/12/2013", 4 "17/12/2013", 2 "17/12/2013", 4 "17/12/2013", 5 "17/12/2013", 2 "17/12/2013", 5 And I want the script to read it, and for example output to the console: In your file the data is present 3 times. How can this be done? A: Try something like this. The default delimiter is comma. \$ cat file.csv "17/12/2013", 4 "17/12/2013", 2 "17/12/2013", 4 "17/12/2013", 5 "17/12/2013", 2 "17/12/2013", 5 \$ cat >list.py import csv with open('file.csv') as csvfile: d = {} for row in csv.reader(csvfile): k, v = row if v in d: d[v] += 1 else: d[v] = 1 for key in sorted(d): print key, a1d647c40b

Another day, another candidate for the Oval Office seems to have fallen prey to sexism. That, despite a record number of women running for president. Politico reported Friday that former North Carolina Sen. Kay Hagan, who lost her seat to upstart Republican Greg Brannon, called a voter who supported her opponent a “bitch” and “rude.” A former staffer for Hagan’s opponent, Brannon, told Politico Hagan said the insult, which was directed to a female voter. Hagan was running for re-election in the red state of North Carolina, which is a key swing state. Hagan did not respond to the report. A Brannon spokesman told Politico the candidate would have no comment. Of the 20 women running for the GOP nomination, 19 have dropped out of the race. Former Arkansas Gov. Mike Huckabee, who has a close relationship with the evangelicals who would be a critical part of the Republican electorate, is the lone female Republican left. But that doesn’t mean there aren’t plenty of female Democratic candidates. At the moment, there are 20 women seeking the Democratic nomination for president, more than double the number of women running for the same position in the Republican Party. But despite this gender disparity, women still seem to be having trouble getting heard. The Washington Post’s Jim Tankersley wrote recently that women were having trouble distinguishing themselves in the field because the Democratic candidates were “not that different.” Read next: Why Are Women Less Likely to Be Top-Rated Salespeople?
