**What's New in the Kartaset?**

Kartaset is an easy to use cardfile database program. It will allow you to store and organize any kind of information, suitable for businesses or home use. Use Kartaset to store notes, e-mails, customer data, personal information, recipes or any other text-based information. With Kartaset's unlimited cards and categories, information management has never been so easy and intuitive! Kartaset is the perfect personal information manager (pim) software application - use it as a simple Rolodex, or a more complicated card index program, using categories to sort your text cards. The main window will open, and you can search for categories, insert new cards, or delete existing cards. You will find an advanced search function, where you can search for keywords and the date on which a card was created, inserted or updated. Also, you can sort your cards by the name of the card, or by the date on which the card was added or updated. You can also create cards for yourself, and add notes to any of your cards, or to any of the existing categories in your kartaset file. Kartaset is a simple yet powerful software application, which supports any type of file, and can store an unlimited amount of cards. It is easy to use and intuitive, and yet powerful enough to allow you to organize any kind of information, into categories, and to search for any kind of information, including data. Get Kartaset to help you organize your information in a simple and intuitive way! Important: Kartaset is not your standard Microsoft database, it is a separate application. Your data will be stored in a.dbk file. User Reviews of Kartaset Overall Rating 9/10 9.5/10 Reviews on this program are very positive, since a number of reviewers have actually used this software.
