

Flexi10 sets a new industry standard with new robust features designed to maximize productivity while aiming for a sustainable future. Compatible gate barriers BFT offers several options for barriers for garages, shopping centers and other facilities where they can work in tandem with gates. The Flexi automatic barrier provides not only safety, but also the necessary comfort: it can automatically connect to the supplied tires and receive signals from photocells to open and close. The direct connection to the control circuits makes it easy and quick to point the arrow at the gate. Compact and intuitive for drivers, the Flex Automatic Barrier (latches on FWD and FDL models) is a convenient and easy-to-use system that is attractively priced and makes full use of space. Different versions of barriers are available in three colors and with a wide variety of boom lengths. The shortest model, the MRK100T, is only 1.4 meters high, making it the most accessible for installation in garages where there is minimal mounting space. The standard version of the Flex MRF barrier has a boom length of 2.2 m and a width

of 600 to 900 mm. Boom coated with rubber for increased durability, protects the barrier from corrosion and is durable. In the MRG100T version (boom length 2 m, width from 600 mm to 900 mm), the length and width remain unchanged, but the fastest closing and opening speed is provided. You can contact our specialists by filling out the form below. They will contact you shortly.

enter the code shown in the picture The FabrikArt company is the Official Distributor in Russia and the official dealer in Moscow and the Moscow region of FAAC products.
