Autodesk are looking for ways to move EA from being an add-on into the main system of AutoCAD to allow developers to build extensions for AutoCAD. In 2003 Autodesk released Extensions Architect (EA) 2.0, and renamed the product Extensions for AutoCAD (XA). XA was the framework for the following products: AutoCAD Architecture (AutoArch) AutoCAD Civil 3D AutoCAD Electrical AutoCAD MEP AutoCAD Print (add-on) AutoCAD Architecture for Construction AutoCAD Structural Dynamics AutoCAD Town (add-on) AutoCAD Workgroup AutoCAD X XA has been superseded by the framework EA 2015, which was released in 2015 as part of the release of AutoCAD 2016. The XA framework is made up of the following elements: EA Core (packages and classes) EA Application Framework (the runtime) EA Web Services Framework (EA Web Services, which was the AutoCAD application programming interface) EA Developer Framework (EA Application Framework functionality exposed to EA Core) EA has been renamed and reorganized in AutoCAD 2016 Release. XA is now a module inside EA and it uses the EA Core as its runtime. XA is used in place of AutoLISP in AutoCAD. Over the last decade, the composers Frederic Rzewski and Pierre Boulez (with the support of institutions such as the American Repertory Theater in Cambridge, Massachusetts, and the Brooklyn Academy of Music), together with the musicologist Elizabeth Hildegard Schoepfer (who has been conducting important research on Boulez's relations with Le Théâtre du Soleil), have been establishing links between Boulez's interests in theatre and literature (Boulez's 1931 essay "Pastiche" has often been referred to as his seminal text on "Structure and Meaning in Music"). The result is a book that brings together these strands. It makes sense that Boulez, in his essay "Music and the Arts," wrote that "every work of art has two faces; the one of a work that is detached from its surroundings, and the one that is attached to them." It was a quote from Karl Marx's 1853 text "On Religion," in which Marx wrote that "every great and original work of art springs from the combination of two contradictory forces, of which one must finally be negated, in order for the other to reveal itself." The more an artist is able to balance these contradictory forces in his or her work, the better is the music. Boulez has stated that he sees music in terms of a relation between these "two contradictories": "one has to be a relation to the real, the concrete, the earth and the people, while the other has to be a relation to the abstract, to the eternal, the immaterial, the Absolute."
