PhotoCrypt Pro is a lightweight software application whose purpose is to help you encrypt your photos and password-protect them. Clean feature lineup The tool impresses with an intuitive design. Images can be dragged and dropped directly in the main panel or imported via the built-in browse button. You can preview the photos in the GUI and view a few details about each file, such as location, format and size. PhotoCrypt Pro works with several file formats, like JPEG, BMP, PNG, EMF, EXIF, ICON, GIF, TIFF, WMF, and EXIF. Batch image encryption options You can make use of batch actions for processing multiple pictures at the same time. Encrypting images can be done by protecting them with a user-defined password. The encrypted files have a new extension (CRYPT). When it comes to output settings, you are allowed to save the encrypted files to the same directory as source items, delete source pictures, or pick a location from your computer. You can process only the selected items and clear the entire workspace. The decryption process can be carried out via the application's interface, provided that you know the right password. Tests have shown that PhotoCrypt Pro executes encryption/decryption tasks very quickly and without hampering your system performance. Extra encryption settings PhotoCrypt Pro gives you the possibility to password-protect not only photos but also video and audio files. It offers support for various file formats, such as 3GP, ASF, AVI, FLV, MKV, MP4, MPEG, WMV, AAC, MP3, WAV, and WMA. Final words All things considered, PhotoCrypt Pro provides a quick and efficient software solution for helping you encrypt photos, songs and videos, and can be handled by beginners and professionals alike. Hey I'm new to photoshop and I've got a question: how do I make a flower curve to look like that in photoshop? I'm only wondering if there's something I should know about Photoshop Curves. The flower's face is a circle with a black gradient going through it. The black color ends when it touches the sides. The white color is a blue gradient. So far I've been able to draw circles, lines, and shapes and then change the color settings. But I couldn't find anything about Curves. The Curve I want to make is something like this but in 77a5ca646e
